***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 11-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Nabity et al (US 5,557,536).

Regarding to claimed invention as best understood, Nabity apparatus includes a transmit signal generator 46 and a timing circuit 44. The timing circuit 44 controls the time at which signals are transmitted into the fluid flow. The timing circuit 44 is used to control the sampling time and repetition rate of the transmitted signals for the purpose of scanning across a range of sampling times and rates, see column 6, lines 31-65. On column 8, lines 34-column 9, line 2 Nabity et al discloses that sampling is accomplished at a fixed rate. Regarding to claimed step, Nabity et al teaches ultrasonic velocity measurement system for measuring flow rate of fluid comprising ultrasonic transmission section for transmitting signal into fluid, and ultrasonic receiver for receiving reflected ultrasonic signal, see at least abstract. Nabity et al also includes transmission timing control section such as time-control and computation system 48 to control the synchronization of the entire flow meter, see col. 6, lines 31-40 and lines 51-65. On col. 7, lines 5-11, Nabity discloses the calculating of flow of fluid in flow stream from the time control and computation system.

***Allowable Subject Matter***

1. Claims 1-10 are allowable over prior art.
2. The following is a statement of reasons for the indication of allowable subject matter: the cited prior art does not teach a transmission timing control section to transmit an ultrasonic wave in accordance with a plurality of transmission modes different in transmission timing from each other, wherein said transmission modes includes first and second mode as in claim 3.

***Conclusion***

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
